

EXECUTIVE CYBER RISK COMMAND CENTER — HIGH-LEVEL FLOW

YVI DWAN Cyber Command Center • Risk → Impact → Decision → Action

Note: The 12 domain solutions in Stage 1 correspond to YVI Tech's full use-case portfolio (SOC/MDR, IAM/PAM, CSPM/CNAPP, Ransomware Readiness, VAPT/ASM, Phishing/BEC, Compliance, PCI DSS, OT/ICS, AI Governance, Third-Party Risk, vCISO) — the Command Center is the aggregation layer sitting above all of them, not a replacement for any one domain tool. Diamond boxes denote decision checkpoints; dashed loops indicate re-routing back to an earlier stage or forward into the closed-loop reporting cycle.
